SUDAFED® & SUDAFED PE™
A New Formula and a
SAFE Public Health Solution

Federal law requires placing pseudoephedrine-based cold products behind the pharmacy counter, to prevent the conversion by criminals to methamphetamine. The makers of Sudafed® nasal decongestant have been working in partnership with government, law enforcement and retailers to address the issue of methamphetamine production and abuse and have now introduced Sudafed PE™, a new pseudoephedrine-free line of decongestants that provides maximum strength relief.

Sudafed PE™ contains the decongestant phenylephrine, which cannot be used to make methamphetamine. Together Sudafed® and Sudafed PE™ offer sinus, cold and allergy sufferers a broader, more convenient range of options for treating their symptoms.

Ask store personnel at your local retail location for help in finding original Sudafed® and new Sudafed PE™.

Take the right Sudafed PE™ for you.
